PARI VORTEX®

Antistatic Holding Chamber/Spacer

WITH NEW PEDIATRIC MASKS

www.pari.com/vortex

Advantages of PARI VORTEX®

- Antistatic, aluminum chamber ensures efficient and consistent medication delivery with MDIs for optimal treatments.
- The flexible connecting ring is compatible with most common metered-dose inhalers.
- Mouthpiece cap protects the VORTEX® from unwanted debris.
- The VORTEX® and masks are dishwasher safe and boilable, making cleaning and disinfection super easy!
- VORTEX grows with you—our interchangeable masks eliminate the need to purchase a new spacer when changes in mask size are needed.
- The patented one-handed operation aid makes treatments easier with babies or for those who have manual coordination difficulties.

PARI VORTEX® – ideal for patients of all ages

VORTEX with Mouthpiece
4 years and up
Part No.: 051F8000
HCPCS No.: A4627

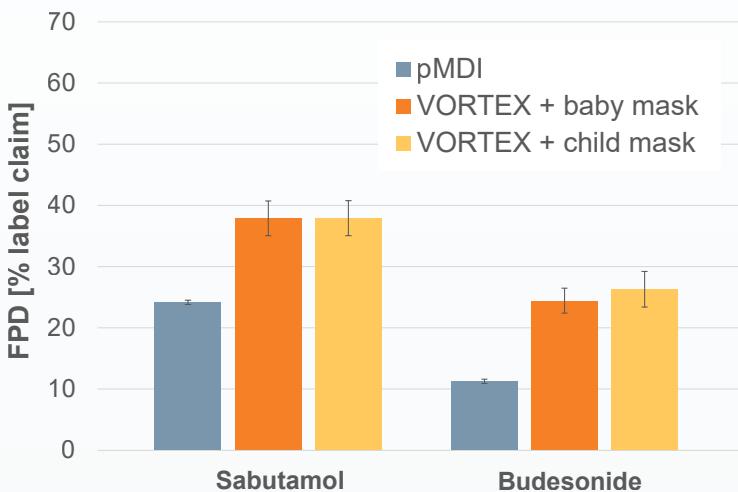

One-Handed Operation Aid
Part No.: 044F5100

EXCELLENT AEROSOL PERFORMANCE

A good seal is key to effective inhalation when using a mask with a holding chamber/spacer. PARI's new masks show excellent sealing capabilities even when applied gently to the face. When compared to MDI alone, PARI Vortex with masks show an increased fine particle dose (FPD, $<5\mu\text{m}$) and low throat deposition with both salbutamol and budesonide.

Figure 1: Results for FPD of pMDI, VORTEX® with baby mask and VORTEX® with child mask for salbutamol and budesonide

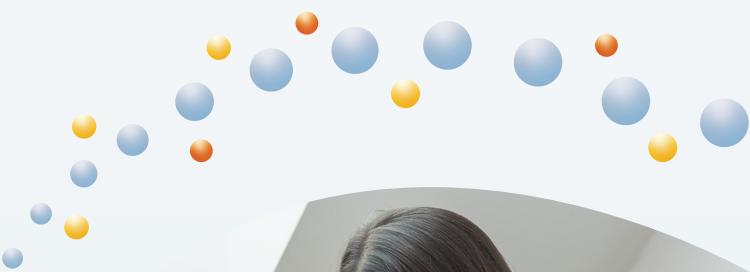

PARI LENDS A HAND WITH THE ONE-HANDED OPERATION AID

The patented one-handed operation aid helps simplify treatments with babies and small children as well as for adults who may have manual coordination issues or reduced strength in their fingers.

DISHWASHER SAFE

Thanks to the durable aluminum chamber and removable mouthpiece, the VORTEX® and masks can be boiled, disinfected, and washed in the dishwasher.

VORTEX® pediatric masks

Excellent aerosol performance

Robust seal even when applied gently to the face

Comfortable fit

The soft mask fits seamlessly to the contours of the face

Dishwasher safe

Easy to clean, dishwasher safe, and boilable
