Value-added performance

Philips Respironics Pico – traditional nasal mask

1 Before putting on the mask, make sure the cushion fits the width of your nose without blocking your nostrils.

2 Disconnect the headgear clips by twisting them away from the frame like a key.

3 Holding the mask against your face, gently pull the headgear over your head.

4 Reconnect the headgear clips by pressing onto the mask frame.

5 Adjust the lower and upper straps by pulling the tabs back gently. Do not over-tighten; the mask should fit comfortably.

6 Final adjustments for comfort and seal should be made while lying down with your device pressure applied.
